

Electromotor Eyprom

Company profile

ELECTROMOTOR EYPROM, S.L is an engineering company which develops its activity within industrial automation in different industrial sectors

- ❖ Automotive
- ❖ Aeronautics
- ❖ Food industry
- ❖ Building

With more than 23 years of experience in machinery designing and construction, we have acquired high degree of technological qualification, coming up with innovative solutions and carrying out our processes until we assure the correct work of our machinery to the client. So we have been achieving a certain level of satisfaction among our clients, that not only our clients but also guaranteed by the systems of quality and environment guarantee our processes. **ISO9001 e ISO14001**

Objectives

Offering cutting-edge technology solutions

Developing our I+D to benefit our clients

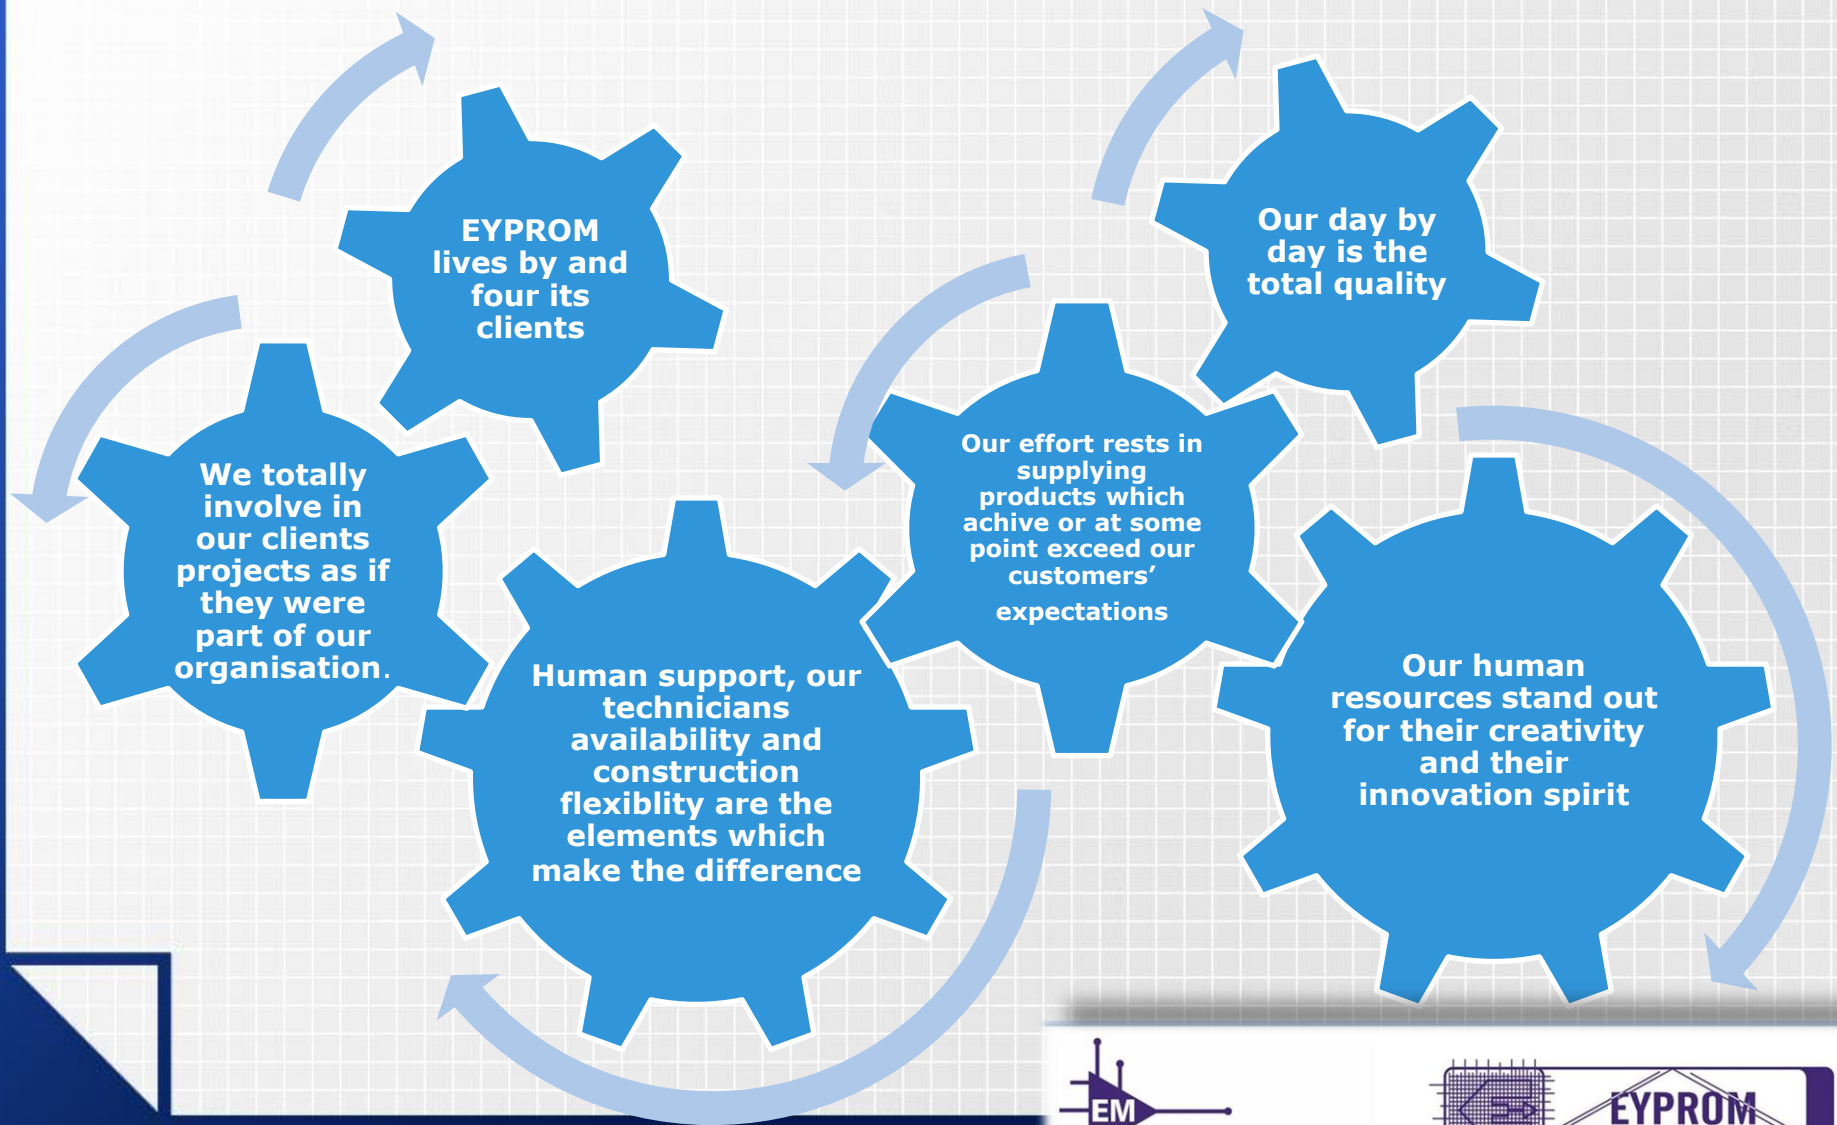

Innovating and developing new projects

Advising and boosting our client attention

Contributing our know-how to clients

Principles

Competitive advantages

- High-qualified engineers
- Experience and Know-how
- Flexibility
- Extensive technological sources
- Total commitment with our clients

Location

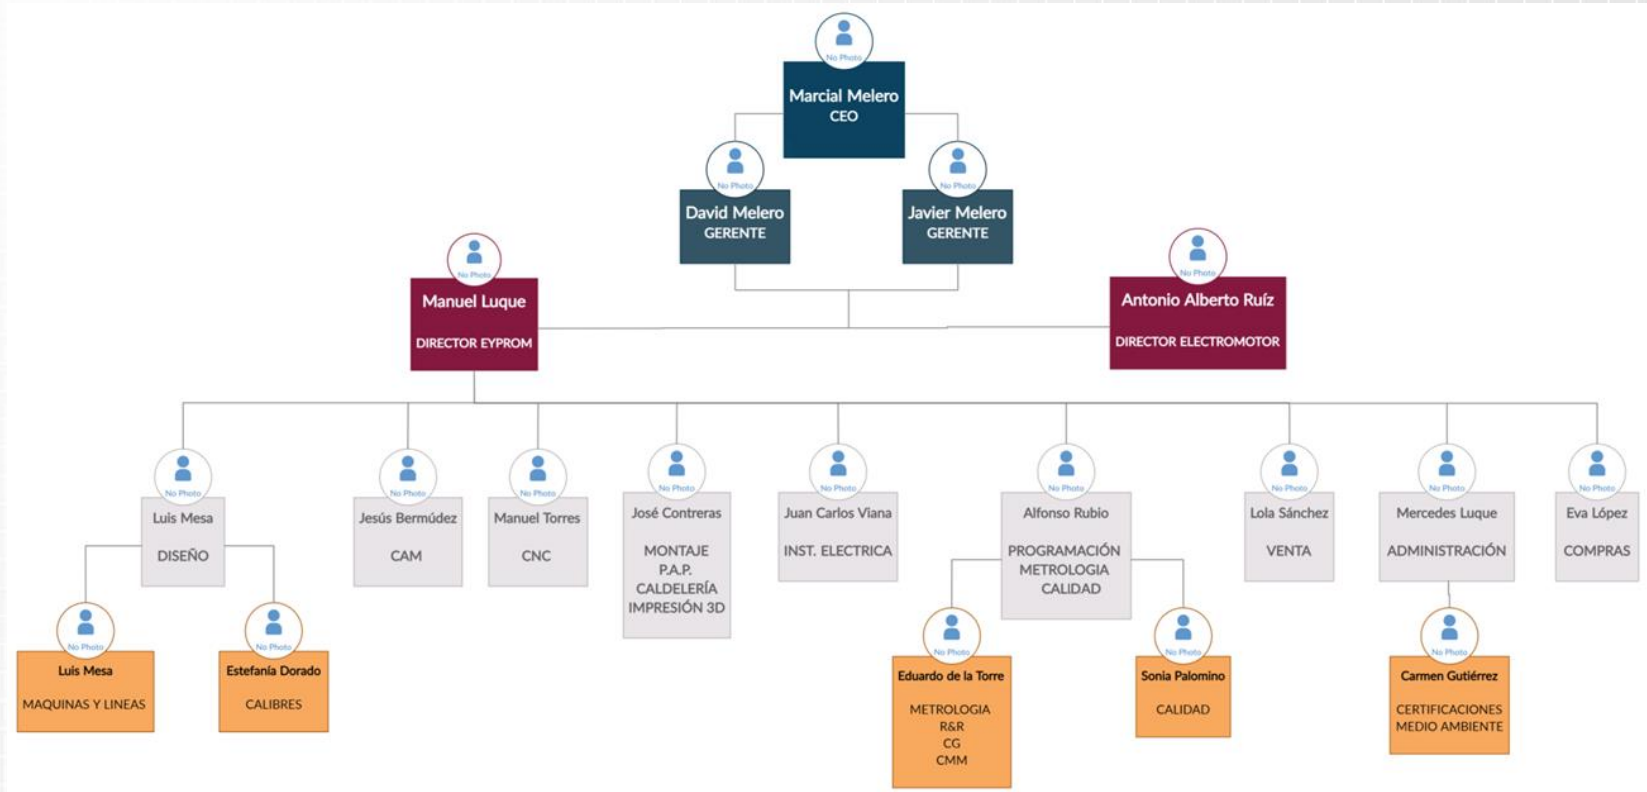

**Electromotor
Eyprom**

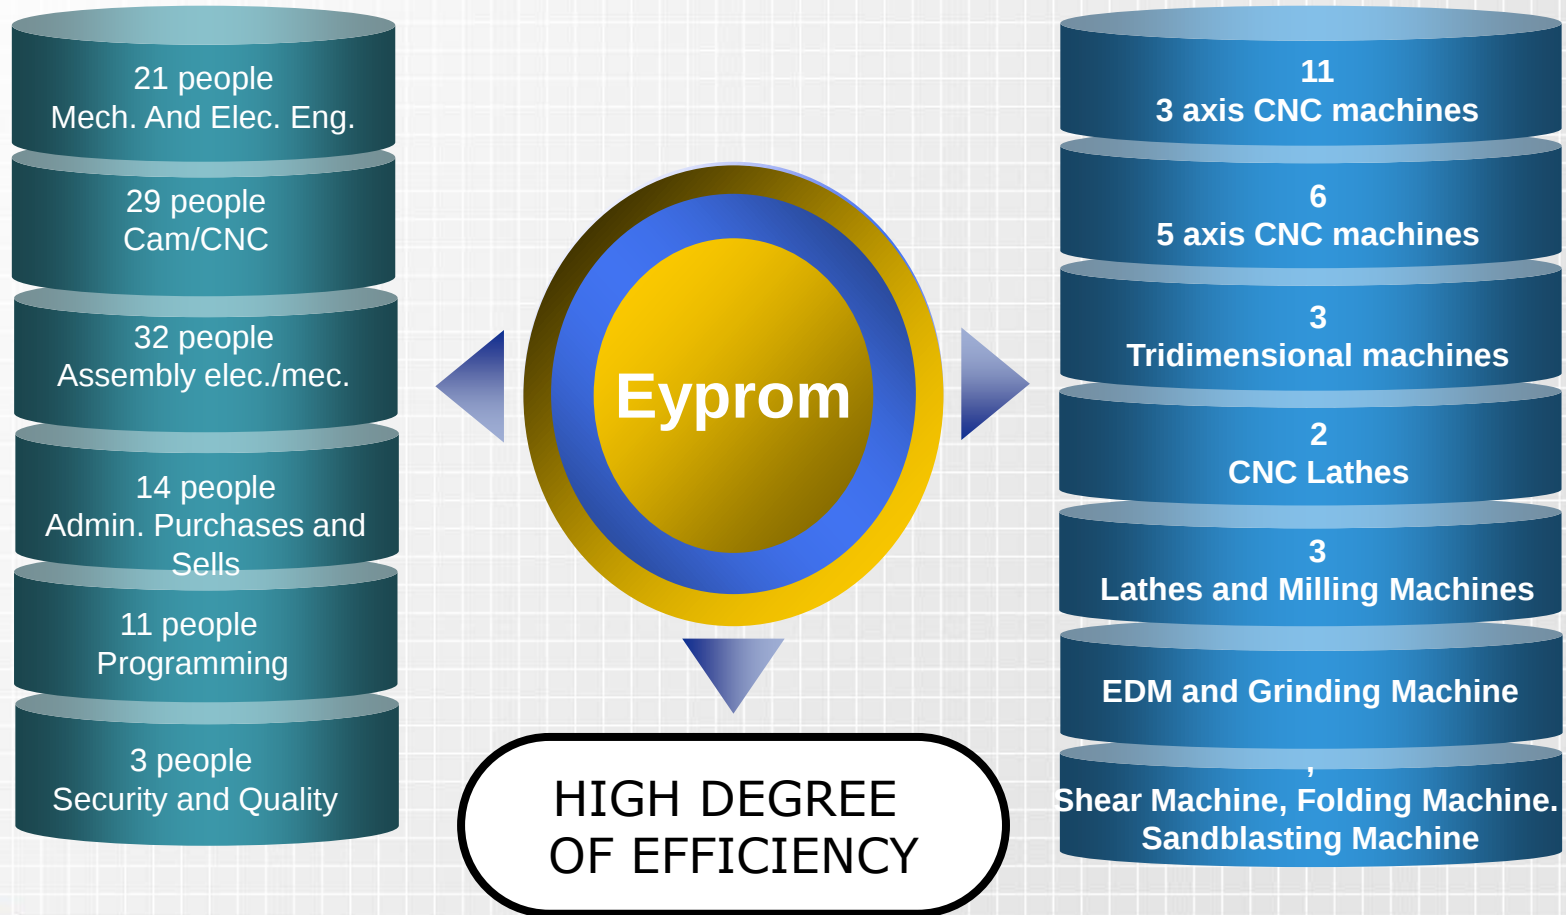

Avenida de la Forja (Pol Ind Cañada de la
Fuente) s/n , Martos, Jaen,
23600, 23600

Telf: 953 70 24 17
